**Subject:** Microsoft settlement

I DO NOT believe the Microsoft settlement was fair. Microsoft was and still is guilty of unfair practices regardless of who they do business with. Products sold to the public are intentionally faulty and the "fix" is always sold as an "upgrade." I believe that Microsoft should have been completely shut down, divided into a million pieces and David Gates sent to jail for the rest of his natural life.

Thanks for the opportunity to vent. I know it won't do any good. The bad guys all win these days and I am sure will continue to win until the U.S. is just another totally corrupt country.
